

## How to use the wiki

If you are a PhD student or above you will have access to edit the wiki, so please use this guide.

### Editing pages:

Click edit in the top right.

To create a heading add a # next to the line you want to be a title. Add up to 3 for successively smaller headings.

An \* can be used as a bullet point, numbers to create a numbered list.

To add an image use: 

To make a hyperlink use: [link text](link)

Click save page when done.

### New pages:

Click new page in the top right. Be sure to link the page into the menu system using the instructions above on other pages.

### Uploading documents:

Click <>code in the top left.

Navigate to the folder you wish to upload to.

Click upload file

Click choose file

Click commit changes

To link to a document use the link on the url when viewing a document here, or for a photo right click the image, click view in new tab, and use this url to link to.

Do not delete other content unless it is incorrect, feel free to add content but always link it up properly.
